

ENDOSCOPIC ULTRASOUND REPORT

PATIENT NAME	PATIENT ID	DOB	AGE	SEX	EXAM DATE	ATTENDING PHY	REFERRAL
N. JOHNSON*	47626	05-07-1954	52	F	03-30-2007	Attending Physician, M.D.	John J. Williams* M.D.

INDICATION : Submucosal mass

CONSENT : Informed consent was obtained from the patient after providing opportunity for questions.

PREPARATION : EKG pulse, blood pressure and oxygen saturation monitored.

INSTRUMENT : Radial, UM130, 1200475

ANESTHESIA : Demerol 100 mg IV
 Versed 1 mg IV
 Diprivan 60 mg IV
 Fentanyl 150 micrograms IV

PROCEDURE : After informed consent and sedation the patient was put in left lateral decubitus position. The Endoscopic Ultrasound scope was passed through the oropharynx into the Stomach in standard technique. Further evaluation was done under contiguous withdrawal.

FINDINGS

ESOPHAGUS

- submucosal mass noted on proximal esophagus at 20-25cm from gums. It was well circumscribed, hypoechoic and measured 2.5 x 2.4cm. FNA done with 22G needle- total 2 passes.
 - Subcarinal Lymphnode - flat, homogenous with benign appearance
 - not examined
 - not examined

- LUNG**
- PANCREAS**
- STOMACH**

IMPRESSION - Submucosal mass noted on proximal esophagus at 20-25cm from gums

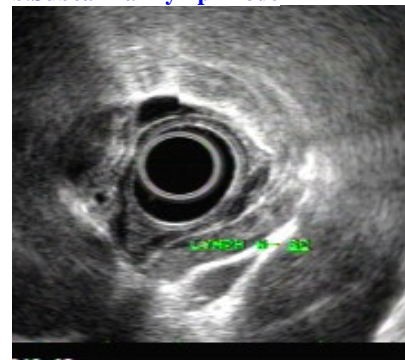

PLAN - f/u results of FNA
 Follow up in GI clinic in 1-2 weeks

CPT Code(s) - 43238- with transendoscopic US guided intramural or transmural fine needle aspiration/biopsy(s), esophagus (includes endoscopic ultrasound examination limited to the esophagus)
 93976 - Color doppler

a. Esophagus

b. Subcarinal Lymph node

c. Esophageal submucosal
