

NOW AVAILABLE MD-REPORTS THROUGH DIANON PATHOLOGY

Dianon is proud to collaborate with MD-Reports to bring clients the best tools for their practices.

Dianon Pathology is proud to announce a collaboration with MD-Reports, which will allow clients a range of benefits to ensure more efficient operations.

MD-Reports Endoscopy Report Writer is one of the industry's leading Procedure Writing Software that provides a very high return on investment. MD-Reports offers ready-made, out-of-the-box templates for the endoscopy center. Also, it features a gastroenterology/endoscopy specific dictionary, unlimited image/video capture and benchmarking standards for reporting (i.e. GIQuIC).

Dianon Pathology is a leading provider of anatomic pathology with subspecialty expertise in gastrointestinal pathology. Dianon's comprehensive test menu includes gross and histological evaluation of GI and liver biopsy tissue, and molecular and genetic methodologies. Combining scientific experience with innovative laboratory technologies allows Dianon to provide comprehensive, rapid-response diagnostic testing to support optimal patient care.

The highlights of the Dianon/MD-Reports collaboration include:

- Auto generation of pathology requisitions and labels / generate daily pathology log.
- Pathology integration with the endoscopy software (MD-Reports) available upon registration.
- Access, track and manage pathology results electronically within the endoscopy software (MD-Reports).
- Auto Generation of Adenoma Detection Rate (ADR) with a tight integration – allows for automated, seamless data reporting of adenoma rates to GIQuIC, eliminating a need for manual data entry.
- Identification of pathology findings to support clients in managing follow-up protocols and interfacing to GIQuIC.
- Integration of Patient Demographics from Practice Management Software into MD-Reports through the use of Dianon's Endokey™ option (additional charges apply to client).

What you get with MD-Reports GI Endoscopy Reporting System

- GIQuIC-certified platform to help keep track of all the GI quality measures.
- Automate the documentation of ASCQR09 / ASCQR10 measures to report to CMS.
- An easy to use and flexible (customizable by provider) system.
- Go-live in less than 30 to 45 days from the date of approval.
- Tightly integrate with your EHR / PM for better data flow and efficiency. This is done at a fraction of a cost compared to MD-Reports competition.
- The cost of ownership of MD-Reports is less than half of our competitors.

What you get with Dianon PATHOLOGY

- Daily intradepartmental review: The GI pathology department conducts a daily review of malignant and challenging cases, providing a built-in second opinion. This helps ensure diagnostic accuracy and maintains a consistent level of quality.
- Interdepartmental consultations: Cases that require the expertise of multiple subspecialties, such as hematopathology or dermatopathology, are shared with other Dianon expert pathologists for their review, providing seamless integration across disciplines.
- Comprehensive test menu: Dianon offers full anatomic pathology services complemented by a comprehensive clinical and molecular test menu.
- Innovative anatomic pathology services: Dianon is an industry leader in delivering technical component pathology solutions.
